

Eric Klein is Superintendent for Klein Electric & Underground in Wakefield, Nebraska. He graduated from Northeast Community College, obtained his Journeyman Electrician License and his Journeyman Lineman License.

Eric's professional experiences began when he was 14 for the family business as a laborer and ground person and then throughout high school and college. Eric worked as a laborer for Watts Electric and was promoted to equipment operator. In late 2007, he began working for his family business. Eric has helped transform the small commercial electrical contractor into a diversified overhead and underground utility construction company while still maintaining a footprint in the electrical industry.

Eric said, "I would be an excellent choice for Vice President of NUCA of Nebraska because I have served on the Board of Directors for the past 3 years and have also been an active member on the One Call Committee, Chaired the Industry & Government Relations Committee this past year, and helped form and Chair the NUCA of Nebraska Political Action Committee (PAC). I also have many qualifications within the utility industry for both wet and dry contractors. I have been through all the learning curves and challenges that come with the territory and have been able to succeed. I understand the challenges of today's marketplace and have the ability to help work through these challenges to benefit the industry."
